PROFESSIONAL EXPERIENCE

Senior Solutions Architect

June 2021 – Present

Mediacorp Pte Ltd

Singapore

- Lead a team consisting of backend developers, frontend developer, QA and Support engineer
- Successfully executed Drupal 8 to 9 and 9 to 10 upgrades for multiple high-traffic platforms
- Led Acquia Cloud to Acquia Cloud Next upgrades ensuring seamless migration
- Implemented AI and services integrations including AI Search, OpenAI modules, and Beyond Words text-to-speech
- Developed email templating using Braze CMS for enhanced user engagement
- Work with product owners and development team members to determine new features and user stories
- Review code, track projects functionally/technically and drive delivery of modules. Leverage DevOps tool stack to build, inspect, deploy, test and promote new or updated features
- Actively participate in all Agile ceremonies including planning, grooming and product demonstration
- Provide code reviews/support/development/deployments for MOE microsite
- Respond to trouble/support calls for applications. Create documentation including detailed specifications, implementation guides, architecture diagrams and design documents
- Train and mentor new joiners for smooth onboarding
- Work on web optimizations, increasing web traffic and new initiatives related to both backend and frontend

Software Engineer (R&D)

April 2019 – June 2021

Acquia India Private Limited

India

- Developed new plugins/modules for Drupal CMS (Acquia Product), automation scripts for testing and PSR4 standard reviews
- Implemented API Integration and provided support/solutions to customers in setting up plugins
- Worked on multiple Drupal 8 websites under NDA with focus on site building, backend plugins, templates, hooks, services and debugging
- Handled migrations, Search API integrations, and worked on Acquia products: Site Studio, Cloud, Lift, CMS, and Machine Learning Dev tasks

Application Development Senior Analyst

February 2017 – April 2019

Accenture

India

- Supported multiple features involving various contributed/custom modules with complicated business logic
- Extended own contributed module to create a chatbot to automate developer work, including changing configurations in settings.php
- Resolved multilingual website support issues and created Drush commands in Drupal 8 for various operations
- Implemented feed integration, module development, theme customization and configuration management initiatives in Drupal 8
- Worked on government portal projects including EDF Energy portal (<https://www.edfenergy.com/>)

Software Engineer

October 2014 – February 2017

Faichi Solutions

India

- Worked on Drupal 8 projects for clients including Ixia (<http://www.ixiacom.com>, <https://support.ixiacom.com>) and Haivision (<http://www.haivision.com>)
- Handled multilingual website support issues and created Drush commands for various operations
- Implemented feed integration in Drupal 8, module development, and theme customization
- Sliced templates in Drupal 8 and led configuration management initiatives
- Served as Full Stack Developer for Drupal 7 projects with module development and theme customization

Software Developer

January 2013 – September 2014

Iksula

India

- Developed Drupal Commerce solutions, custom modules and debugging for Drupal 7
- Worked with Panels/Contexts and other contributed modules, Views, Batch and other APIs in Drupal 7
- Implemented complete discount structure logic for books category for eBay.in project
- Developed projects including <http://www.bigbazaardirect.com>, <http://www.gitanjaligifts.com> and internal tools

Software Engineer

June 2011 – December 2012

Corpus Software

India

- Developed responsive websites using PHP, MySQL, JavaScript, and Drupal
- Created custom themes and maintained client websites
- Provided technical support and conducted training sessions for government corporations on ERP workflows

KEY PROJECTS**CNA (Channel NewsAsia) — Lead Solutions Architect**

Singapore's leading English news platform (<https://www.channelnewsasia.com/>). Architected headless CMS with 99.9% uptime serving millions daily.
